

Aberystwyth Robotics Club

With the society, you'll be able to build and code **your own robots.**

Starting this year, we've joined with **AberSailbot.**

Everyone is welcome.

From people that have never touched a robot to people who have built many.

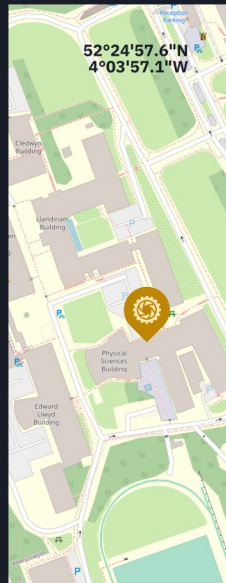

For those with interests in **sailing and robotics** Sailbot is a fun way to combine the two!

Robotics holds drop-in craft and skills sessions **every Wednesday from 2pm till 5pm.**

We're located in the first year physics lab - **MP1.00.**

This is located just above the ground floor lecture halls in the **physical sciences building.**

We also run **extra events** which happen 1-2 times a month.

We announce these additional events on our **Instagram page** and **Discord server**, which you can join with the QR code or using our link:
